# COPPER MAGNET WIRE

## Product Data Sheet

### CW MICA

#### Class 155°C Copper

---

#### DESCRIPTION

CW MICA is a mica wrapped insulation system for higher voltage or higher turn stress applications.

This results in an insulation system that provides excellent dielectric properties and superior long term corona resistance.

#### APPLICATIONS

- High Voltage Motors
- Wind Machines
- Transit Motors

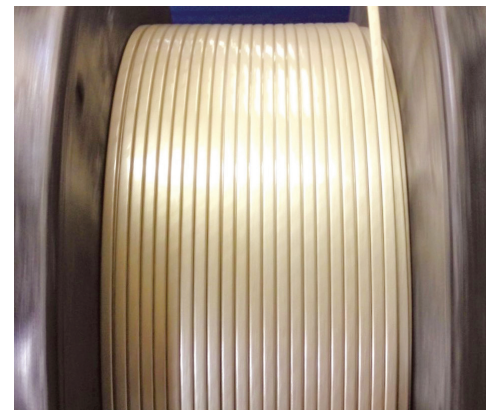

---

#### FEATURES & BENEFITS

- Excellent dielectric properties
- High temperature continuous operation
- Superb windability
- A wide range of types suitable for most any application

#### AVAILABILITY

CW MICA is available on copper conductors in various lappings. It is also available over CW 200 enamel.

Please consult the Craig Wire service team for more detailed information.
