# COPPER MAGNET WIRE

## Product Data Sheet

### CW 240 TP

#### Class 240°C Copper

---

NEMA MW 64-C/65-C

### DESCRIPTION

CW 240 TP magnet wire is a polyimide tape insulated system for continuous operation at 240°C or above.

This results in an insulation system that provides excellent dielectric properties and higher temperature capabilities for more severe applications.

### APPLICATIONS

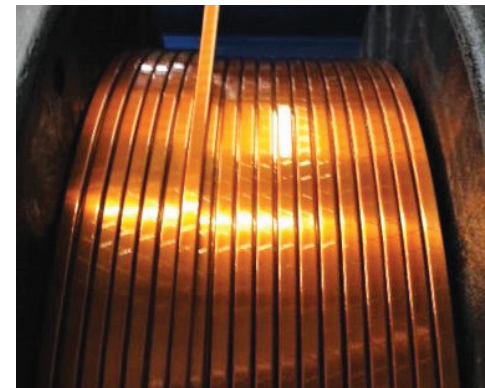

- AC Motors
- DC Motors
- Submersible Pumps
- Traction Motors
- Applications requiring a high temperature insulation

### FEATURES & BENEFITS

- Excellent dielectric properties
- High temperature continuous operation
- Superb windability
- A wide range of types suitable for most any application

### AVAILABILITY

CW 240 TP is available on copper conductors in various types and lappings.

Please consult the Craig Wire service team for more detailed information.
